

**Graduate Nurse Residency Program**

Infirmary Health is devoted to helping new graduate nurses transition from classroom and clinical settings into the professional practice of nursing. We offer a 12- month program to assist new graduates in becoming confident and more clinically prepared to care for our growing population in need of care.

Each new resident will complete a 12- month long residency program at no cost. This program involves monthly classes consisting of reflective, didactic curriculum and a PI Project that is evidenced based utilizing a nursing framework and follows ANCC Practice Transition guidelines.

**Our program covers:**

- |   |                                      |
