About Mobile Infirmary
Mobile Infirmary forms the cornerstone of Infirmary Health which is recognized as one of the top healthcare systems in the nation with a legacy of exceptional patient care and state-of-the-art technology.

Mobile Infirmary is the largest Infirmary Health facility, with 677 beds in the medical center and 42 beds at the J.L. Bedsole Rotary/Rehabilitation Hospital. Mobile Infirmary has more than 2,500 employees and 650 physicians on staff.

Accredited by The Joint Commission, Mobile Infirmary is a Level III Trauma Center and is a Stroke Center of Excellence. The hospital is also renowned for its cardiovascular program and houses a Bariatric Center of Excellence. Mobile Infirmary is the first hospital in the region to acquire the da Vinci® Surgical System.
About the Program
The ASHP Accredited Postgraduate Year One (PGY1) Pharmacy Residency at Mobile Infirmary is a 12 month training program which is designed to develop advanced knowledge and experience in pharmacy practice skills, patient care and practice management. PGY1 residents will be exposed to a broad range of experiences intended to build the skills necessary to practice as a clinical pharmacist in an acute care setting.

Residents are actively involved in a variety of medication-use decision processes, including participating in pharmacy and therapeutics committee meetings, multi-disciplinary patient care teams, drug information support and research studies. Residents are responsible for developing, supporting and implementing patient care programs, as well as providing cost-effective pharmacotherapy. Residents will also assist in precepting pharmacy students.

The goals and objectives of the residency program follow the ASHP Accreditation Standards for Residencies in Pharmacy Practice. Residents completing the program will be prepared to transition to a PGY2 specialty residency program, fellowship or pursue a multitude of practice options.

Rotations and Experiences
Residents will complete ten rotations. The Department of Pharmacy is affiliated with Auburn University, which also provides, local off-site elective options. Rotations may be tailored to the resident’s goals and interests.
