

Infirmary Grand Rounds Enduring Material

Target Audience: This grand rounds activity has been developed as an enduring material and is designed for medical staff, nurses, technicians and other interested parties. The Alabama Board of Nursing acknowledges AMA PRA Category 1 Credit(s)[™].

Global Objective: Participants will be able to recognize current standards of care on a broad range of healthcare related topics as current cases and issues are shared among medical professionals. Upon completion of this program, participants should be able to identify concepts, procedures and new technology along with applications in clinical medicine.

Breast Cancer Screening: Lifting the Fog of Confusion

Dates & Time of Completion:

Original Release: October 17, 2017

Termination: October 17, 2020

Estimated Completion Time: 60 minutes

Minimum Performance Level:

To obtain 1 AMA PRA Category 1 Credit[™], participant must:

- 1) Legibly complete the **pre-activity quiz** provided as an assessment tool link on Mobile Infirmary Medical Staff website or Infirmary Cancer Care website.
- 2) **View activity content provided as a video link** on the Mobile Infirmary Medical Staff website (or available on DVD to check-out at Mobile Infirmary Medical Library) or the Infirmary Cancer Care website.
- 3) Complete **post-activity quiz with at least 60% accuracy**, inclusive of number credits claimed (1 maximum) and completion date. (Note: Quiz results and activity completion certificate will be sent to participant via email.)
- 4) **Submit both completed pre- and post-quizzes** together to the education department at Mobile Infirmary or email to shauna.labo@infirmaryhealth.org.
- 5) **Voluntarily complete activity evaluation**—via emailed link upon quiz submission.

For Further Study:

J Am Coll Radiol. 2017 Sep;14(9):1137-1143

Educational Objectives:

- Recognize current statistics related to breast cancer
- Compare and contrast the harms and benefits associated with breast imaging
- Adopt screening recommendations in daily practice for the benefit of patients

Speaker

S. LeeAnn Denham, MD
Alabama Coastal Radiology

***Identified Need:** Breast cancer is sometimes found after symptoms appear, but many women with breast cancer have no symptoms. This is why regular breast cancer screening is so important. However, confusion exists from disagreement among major guidelines on when to start screening mammograms and how often to have them. Decisions of when to start and end screening and how often to have it should become a shared decision-making between patient and provider following patient discussions of health histories, concerns and preferences surrounding potential harms and benefits of the screening.*

Minimum System Requirements:

A personal computer or other web enabled device with windows media player or video capability.

Note: To verify CME credit, contact CME coordinator at 435-2578; provide identity, contact information and activity name.

Disclosures: Dr. LeeAnn Denham has nothing to disclose relative to this presentation. There will be no discussion of commercial products or services and no discussion of non-FDA approved products in this presentation.

As planners of the Infirmary Grand Rounds, disclosures and conflict of interest statements of the Medical Education Committee members have been reviewed and there are no indications of a conflict of interest related to the content of this presentation.

Designation Statement: The Mobile Infirmary designates this enduring material for a maximum of 1 AMA PRA Category 1 Credit[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Accreditation Statement: The Mobile Infirmary is accredited by the Medical Association of the State of Alabama to provide continuing medical education for physicians.
